

LUCIENO ZANDRY

Full-Stack Software Developer

- github.com/lucieno-zandry
- +261 34 85 277 52
- lucienozandry4@gmail.com
- Antananarivo, MG — Remote
- lucienozandry.ct.ws
- Lucieno Zandry

SOFT SKILLS

- Cross-functional Collaboration
- Problem Solving
- Ownership Mindset
- Systematic Thinking
- Adaptable
- Remote Communication

CORE COMPETENCIES

- End-to-End Application Architecture
- Database Design & Search Optimization
- Advanced JavaScript & TypeScript
- API Development & Integration
- E-commerce & SaaS Solutions
- Modern UI/UX Implementation
- Version Control & CI/CD
- Cross-Platform Capabilities

LANGUAGES

- English – Professional working proficiency
- French – Professional working proficiency
- Malagasy – Native

CERTIFICATES

- DELF B2 (French proficiency)
- Driver's License (Category B)

Available for remote contract work · Global opportunities

Profile

Full-Stack Software Developer with 2+ years of experience engineering scalable web applications, e-commerce platforms, and SaaS products. Proficient in bridging modern frontend ecosystems (React, TypeScript, Tailwind) with robust backend architectures (PHP, Laravel, Node.js). Skilled at translating complex business requirements into maintainable codebases, designing optimized databases, and ensuring seamless API integrations. Experienced in collaborating within remote-first environments to deliver secure, high-performance solutions from concept to deployment.

Experience

Full-Stack Web Developer

Dec 2024 – Dec 2025

Group VII Origin

- Architected and developed** responsive web applications, ensuring high performance and reliable state management across the full stack.
- Collaborated** cross-functionally in a remote environment to conceptualize, build, and ship robust features on schedule.
- Improved system reliability** by streamlining API communications, conducting rigorous code reviews, and minimizing frontend-to-backend latency.

Software Engineer

Apr 2024 – Oct 2024

Zafy Tody

- Engineered** reusable component libraries and robust backend logic, reducing development bottlenecks for complex UI features by 30%.
- Implemented CI/CD pipelines** using Docker to standardize development environments, enabling seamless integration from staging to production.
- Optimized data models** and backend queries to efficiently serve dynamic client-side applications, maintaining strict code quality standards.

Frontend Developer

Dec 2023 – Mar 2024

Zafy Tody

- Built** scalable, accessible user interfaces using React and TypeScript, adhering to modern component-driven design patterns.
- Integrated REST APIs** with sophisticated real-time data handling, optimizing state updates to reduce overall application load times.

PHP & Web Developer Trainee

Jun 2023 – Sep 2023

Teko Consulting

- Developed** custom e-commerce modules using PHP and JavaScript, expanding the functional capabilities of client-facing storefronts.
- Optimized application performance** by tracking Web Analytics and refactoring legacy codebases for improved stability and faster rendering.

Education

Master I in Information Technology

IT University Madagascar
2024 – 2025

Bachelor's Degree in Software Engineering

Université Privée Hay
2022 – 2023

BTS Degree in Programming

Université Privée Hay
2020 – 2022

Tech Stack & Tools

- React & TypeScript
- PHP & Laravel
- Tailwind CSS / Shadcn UI
- JavaScript (ES6+)
- Git & CI/CD
- REST APIs
- Database Architecture
- Node.js & Express
- Flutter
- Docker
- React Router / Remix
- Redux / State Management
- SASS/SCSS
- Webpack / Vite

Additional: System design (UML/MERISE), polymorphic database relationships, code review workflows, performance optimization

Engineering Focus

Full-Stack Systems Depth: Committed to architecting resilient software solutions from the database layer to the user interface. Currently refining expertise in:

- Advanced SaaS application structuring
- Complex data modeling & polymorphic relationships
- Search logic optimization and indexing
- Modern UI/UX patterns (Tailwind, Shadcn)
- Micro-service & API-first mentalities

I combine AI-assisted productivity with rigorous engineering judgment to deliver clean, efficient, reusable code — built to scale and easy for teams to maintain.
