

LUCIENO ZANDRY

Frontend Web Developer

- github.com/lucieno-zandry
- +261 34 85 277 52
- lucienozandry4@gmail.com
- Antananarivo, MG — Remote
- lucieno-zandry.rf.gd
- Lucieno Zandry

SOFT SKILLS

- Collaboration
- Communication
- Ownership Mindset
- Creative
- Adaptable
- Stress Management

CORE COMPETENCIES

- JavaScript & TypeScript Expertise
- Scalable Web Interface Architecture
- HTML5, CSS3 & Design Integration
- Modern Frontend Build Tools
- Code Review & CI/CD Practices
- Cross-Browser Compatibility & Performance
- Reusable Component Architecture
- REST API Integration

LANGUAGES

- English — Professional working proficiency
- French — Professional working proficiency
- Malagasy — Native

CERTIFICATES

- DELF B2 (French proficiency)
- Driver's License (Category B)

Available for remote contract work · Global opportunities

Profile

Frontend Web Developer with 2+ years of experience building scalable, performant web applications using **JavaScript, TypeScript, React, and modern build tooling**. Proven ability to translate complex product requirements into clean, reusable component architectures while maintaining cross-browser compatibility and optimal performance. Experienced in collaborating with designers, product managers, and backend engineers in remote-first environments. Committed to **code quality, continuous integration practices**, and engineering solutions that are maintainable long-term. Available for remote contract engagement immediately.

Experience

React & Frontend Developer

Dec 2024 – Dec 2025

Group VII Origin

- Architected** responsive, cross-browser web interfaces using React and TypeScript, ensuring consistent UX across all major browsers and devices.
- Collaborated** with designers and backend engineers in a remote-first workflow to deliver pixel-perfect, high-quality UI features on schedule.
- Reduced critical frontend bugs by 25%** through systematic code reviews, structured QA cycles, and improved component testing practices.

Frontend Engineer (React & TypeScript)

Apr 2024 – Oct 2025

Zafy Tody

- Engineered** a scalable, modular component library with React, TypeScript, and SCSS — reducing UI rework by 30% and accelerating feature delivery.
- Implemented CI/CD pipelines** with Docker for environment parity, enabling automated integration and consistent deployments across staging and production.
- Applied best practices** in code reviews, linting, and continuous integration to maintain high code quality across a growing codebase.

Frontend Developer

Dec 2023 – Mar 2024

Zafy Tody

- Built** reusable, accessible UI components with React and TypeScript, following scalable web application architecture patterns.
- Integrated REST APIs** using Axios with real-time data handling, reducing frontend data-fetch latency by 15%.
- Optimized** interfaces for maximum speed and cross-browser rendering consistency using modern CSS and build tool configurations.

Frontend & PHP Developer Trainee

Jun 2023 – Sep 2023

Teko Consulting

- Optimized** frontend performance using Web Analytics tools, achieving 20% faster page load times and improved Core Web Vitals scores.
- Developed** custom e-commerce modules with clean, efficient JavaScript, expanding client-facing capabilities.
- Maintained** legacy applications with a focus on code readability, stability, and incremental improvements.

Education

Master I in Information Technology

IT University Madagascar
2024 – 2025

Bachelor in Programming

Université Privée Hay
2022 – 2023

BTS Degree in Programming

Université Privée Hay
2020 – 2022

Scientific High-School Degree

La Pepite d'Or, Antananarivo
2017 – 2018

Tech Stack & Tools

- JavaScript (ES6+)
- TypeScript
- HTML5 / CSS3
- ReactJS
- SASS/SCSS
- Git & GitHub
- CI/CD Pipelines
- Webpack / Vite
- React Router v7
- React Remix
- Redux
- Axios
- REST APIs
- Docker
- Bootstrap
- Node.js
- Express.js
- PHP / Laravel
- Flutter

Additional: Code review workflows, cross-browser testing, Web Analytics, performance optimization, UML & MERISE system design

Engineering Focus

- Frontend engineering depth:** Committed to delivering high-quality, scalable web interfaces for global teams. Currently refining expertise in:

- Advanced TypeScript patterns & generics
- Performance budgeting & Core Web Vitals
- Automated testing (Jest, React Testing Library)
- Accessibility (WCAG 2.1) & semantic HTML
- Micro-frontend architecture

I combine AI-assisted productivity with rigorous engineering judgment to deliver clean, efficient, reusable code — built to scale and easy for teams to maintain.
