

LUCIENO ZANDRY

Backend-Leaning Fullstack Engineer

- github.com/lucieno-zandry
- +261 34 85 277 52
- lucienozandry4@gmail.com
- Ambatoroka, Antananarivo, MG
- lucieno-zandry.rf.gd
- Lucieno Zandry

SOFT SKILLS

- Stress Management
- Team Spirit
- Creative
- Polyvalent
- Ownership Mindset

CORE COMPETENCIES

- Design Integration
- FrontEnd Creation
- Backend Development & Scalability
- Deployment & Containerization
- System Design (UML & MERISE)
- REST API Architecture & Integration

LANGUAGES

- English – Professional working proficiency
- French – Professional working proficiency
- Malagasy – Native

CERTIFICATES

- DELF B2 (French proficiency)
 - Driver's License (Category B)
- Open to global opportunities · Remote

Profile

Backend-leaning fullstack engineer focused on scalable systems and cloud-ready architectures. 1.5+ years of experience building, deploying, and owning features end-to-end, from API design to containerized deployment. I leverage **AI tooling** to accelerate development while maintaining clean architecture, readability, and long-term maintainability. Currently expanding into **microservices, API gateways, and event-driven patterns** to design systems that scale. Passionate about system thinking, backend resilience, and engineering ownership.

Experience

React & Flutter Developer

Dec 2025 – Dec 2026

Group VII Origin

- Architected** responsive web applications and integrated design systems for cross-device consistency.
- Owned** backend maintenance and API synchronization, ensuring zero-downtime data flow across services.
- Led** Android app enhancements, reducing critical bugs by 25% through structured maintenance cycles.

PHP & React Developer

Apr 2024 – Nov 2025

Zafy Tody

- Designed and implemented** RESTful APIs with PHP/Laravel 11, following scalable architecture patterns.
- Containerized** the full application stack using Docker, streamlining development and production parity.
- Engineered** modular frontend architecture with React, TypeScript, and SCSS, reducing rework by 30%.

Frontend Developer Trainee

Dec 2023 – Mar 2024

Zafy Tody

- Implemented** pixel-perfect design integration and responsive layouts, improving user engagement metrics.
- Integrated** REST APIs using Axios with real-time data handling, reducing latency by 15%.
- Architected** reusable component libraries with React, TypeScript, and SCSS to accelerate future development.

PHP & Frontend Developer Trainee

Jun 2023 – Sep 2023

Teko Consulting

- Optimized** frontend performance using Web Analytics & GPA tools, achieving 20% faster load times.
- Developed** custom PrestaShop modules, enabling new e-commerce functionalities for clients.
- Evolved and maintained** legacy Laravel applications, improving code maintainability and stability.

Education

Master I in Information Technology

IT University Madagascar
2024 – 2025

Bachelor in Programming

Université Privée Hay
2022 – 2023

BTS Degree in Programming

Université Privée Hay
2020 – 2022

Scientific High-School Degree

La Pepite d'Or, Antananandro
2017 – 2018

Tech Stack & Tools

- PHP
- JavaScript (ES6+)
- Laravel
- ReactJS
- React Router v7
- React Remix
- Flutter
- Node.js
- Express.js
- TypeScript
- SASS/SCSS
- HTML5/CSS3
- Bootstrap
- Git & GitHub
- Docker
- Redux
- REST APIs
- Axios
- PrestaShop

Additional: UML, MERISE, Web Analytics, Deployment workflows, CI/CD fundamentals

Learning & Systems Focus

♦ **Engineering trajectory:** Moving toward backend & cloud-native architectures, with a focus on maintainable, scalable systems. Currently exploring:

- Microservice architecture & API gateways
- Event-driven patterns (RabbitMQ / Kafka basics)
- Docker orchestration & CI/CD pipelines
- Service-oriented design & system decoupling

♦ I combine AI-assisted productivity with rigorous engineering judgment to deliver clean, production-ready systems, not just code.
